Dr. Larry Brown’s system of “Esthetic Orthodontics” is used in these early mixed-dentition, non-extraction cases. This system of *Esthetic Diagnosis and Treatment Mechanics, combined with the Straight Wire Appliance (SWA)* is used as a “fixed functional appliance” in order help eliminate Dysfunctional Habits and then to enact “Growth Modification” so as to *change the face*.

**Case:** CLIII skeletal with Anterior open bite, tongue thrust; case requires extraction of 2 teeth on mandible; this case is treated similar to most cases using only the Brackets, wires and intraoral elastics.

**Beginning**
